The Licensed Penetration Tester exam is the capstone that encapsulates the entire information security track of EC-Council. While the Certified Ethical Hacker course teaches an individual what are the threat agents that can compromise the security posture of an organization and the EC-Council Security Analyst program provides a repeatable and documentable methodology that can be used by a security auditor while analyzing the security status of the organization, the Licensed Penetration Tester exam covers a completely different skill-set that is needed by every penetration tester - Report Writing.
